

Paste Bandages and Stockings

For the management of venous leg ulcers

ZIPZOC[◊] Non-Preserved, Zinc Oxide Impregnated Stocking

Sterile rayon stocking impregnated with a preservative free ointment containing zinc oxide 20% w/w.

- Footless stocking presentation allows easy and quick application and removal
- Soothes the skin and assists in the treatment and healing of chronic leg ulcers
- Thin enough to be worn under shoes and can be used as a primary contact layer under graduated compression, where the cause is due to chronic venous insufficiency.

Code	Product description	Items per unit
66000748	80cm	Box/10
66000747	80cm	Box/4*

*Not available in New Zealand

VISCOPESTE[◊] PB7 Zinc Paste Bandages

Individually wrapped, woven bandage impregnated with zinc oxide 10% w/w.

- Reduces skin irritation and provides protection to surrounding skin
- Easy, trauma free dressing changes¹
- Provides a moist wound environment
- Can be used as a primary contact layer under graduated compression, where the cause is due to chronic venous insufficiency.

Code	Product description	Items per unit
4948	7.5cm x 6m	Box/12 Rolls

ICHTHOPASTE[◊] Zinc Paste with Ichthammol Bandages

Individually wrapped, woven bandage impregnated with zinc oxide 6.32% w/w and Ichthammol 2% w/w.

- Reduces skin irritation and provides protection to surrounding skin
- Provides a moist wound environment¹
- Can be used as a primary contact layer under graduated compression, where the cause is due to chronic venous insufficiency.
- Ichthammol may increase absorption of corticosteroids, heparin and chloramphenicol through the skin.

Code	Product description	Items per unit
4959	7.5cm x 6m	Box/12 Rolls
